WORK EXPERIENCE

○ Tech Support

SPEEDTECH IT SERVICES

August 2020 - June 2022

- Addressed customer inquiries, providing technical support and resolving issues efficiently.
- Conducted computer repair, upgrades, and maintenance for desktops and laptops.
- Designed logos, infographics, presentations, and posters to meet client specifications.

○ RPA Developer Intern

BUSINESS PROCESS OUTSOURCING INTERNATIONAL, INC.

January - May 2024

- Developed automation workflows using UiPath, C#, .NET for Outlook Mail processing.
- Created a Sales Invoice Detector project in Python for automated sales data extraction.
- Contributed to the development of a Client Hub Web Application using C# for improved client interaction.
- Utilized pgAdmin as a graphical user interface tool to interact with PostgreSQL databases, enhancing database administration tasks.
- Collaborated on cross-functional teams to gather requirements and implement tailored RPA solutions.
- Conducted testing, debugging, and documentation of RPA processes for reliability and scalability.

PROJECT

○ A Basic Digitalization Solution for Manalo Ice Plant's Customers, Inventory and Sales Administration

Customer Related Management System with Analytics

Capstone Project

- Technologies: HTML, CSS, Bootstrap, Javascript, PHP, MySQL, PhpMyAdmin, and AWS
- Objective:
 - Developed a web-based CRM system for customer, inventory, and sales management.
 - Integrated the system into existing manual processes at Manalo Ice Plant.
 - Improved efficiency in customer management and inventory operations.
 - Implemented features for exporting sales reports in PDF format.
 - Contributed to Sustainable Development Goal (SDG) 12.
 - Interactive dashboard for real-time analytics and reporting
